Inserting the SIM card

1. Remove the removable part of the E8372 LTE key by sliding it
2. Insert your SIM card in the slot (6) **Make sure you have removed the SIM PIN.**

❺
❻

3. Slide the removable part back into place..

4.Connect the E8372 LTE key to one of your computer's USB ports.

5. The drivers are installed automatically in the background.
When installation is complete, the E83712 key managenement web page
(http://huawei.setup or http://192.168.8.1) opens and the E8372 LTE key automatically connects to the LTE network.

Note :

- If the driver installation does not start automtically, locate the AuroRun.exe file in the driver folder and double-click to run it.

- The default username and password for the device management page are admin and 1Password.
